Subject: Pervasive Toxic Aerosol Spraying of San Diego Residents

Importance: High

January 16, 2015

To: Mayor Kevin L. Faulconer, and San Diego City Council Members

From: J. Marvin Herndon, Ph.D.

Subject: Pervasive Toxic Aerosol Spraying of San Diego Residents

I am a scientist (PhD in nuclear chemistry, Post-Doctoral in Geochemistry and Cosmochemistry) and businessman, and have lived in Scripps Ranch for thirty seven years.

Over the past year the skies above San Diego have changed drastically in plain sight. We've been robbed of the beautiful blue skies we associate with our city. Almost every day jet airliners are spraying innumerable so-called "chemtrails" and they persist after release behind the jets to gradually form clouds. Chemical clouds. Toxic clouds. They eventually diffuse and form a white haze in the sky. Sometimes, the artificial clouds are laid so thickly as to make the otherwise blue San Diego sky fully overcast with toxic chemical aerosols. Sometimes, depending on chemical mix, the transition from spray to white haze is rapid. Please see a few examples, attached, that I photographed from my front yard.

Chemicals sprayed into the atmosphere do not remain suspended; they fall to contaminate the air we breathe, our rainwater, and our agricultural soil. This ongoing massive spraying taking place over San Diego represents a grave threat to me and my family, my neighbors, and all my fellow San Diegans.

Rainwater collected after intensive aerosol spraying now reportedly contains elevated levels of aluminum, barium, and strontium and likely other toxins. Aluminum is implicated in diseases such as Alzheimer's, Parkinson's, and autism, whose rising incidence is causing alarm to many Americans. How many additional children will be doomed to suffer a lifetime of autism? How many additional San Diegans will suffer premature brain degeneration or cancer? What horrors lie in store for our children and grandchildren who unknowingly

play outdoors, or the pregnant women with their unborn offspring, or the runners and other outdoor recreationists? What about those of us who suffer asthma or who have compromised immune systems? What about the elderly?

What about your own family? Are we San Diegans no longer free to breathe uncontaminated air?

Why are San Diego's Mayor and members of San Diego City Council silent about this imminent public health threat? Were you duped into believing that toxic chemical clouds will keep Earth from warming? Clouds might reflect sunlight back into space but those same artificial clouds also keep Earth from cooling by not letting Earth's heat escape during the night. Clouds, artificial or natural, trap heat!

Why the silence? Are you afraid there will be demonstrations or riots in the streets if the truth were told about the ongoing activity that poisons the air San Diegans are now breathing? Deception by acquiescence and silence is fundamentally wrong, unless you are a willing participant in activities that will likely come to be characterized as crimes against humanity.

As elected officials you have the responsibility to advise and protect all San Diegans. Please speak the truth and stop this spraying over our homes.

Please advise me of your intentions to make public disclosure of the chemical spraying over San Diego. Kindly respond before the close of business on January 23, 2015, or I will assume you have no intention of responding.

Sincerely,

J. Marvin Herndon, Ph.D.
