[Marcia McNutt is the president](#) of the [National Academy of Sciences](#). Within a few hours of the Geoengineering Watch "[Stop Geoengineering](#)" legal notice press release, McNutt contacted us. The demeanor of her first message below is certainly shocking and unprofessional when one considers the fact that this is the president of the NAS. Her first response is also especially perplexing since [Marcia McNutt has given numerous presentations on the subject of geoengineering](#). Is Marcia McNutt actually completely oblivious to the blatant geoengineering programs that have been fully [deployed and operational for over 70 years](#)? Or is the NAS president paid to try and put out the rapidly expanding fires of public awareness in regard to the ongoing geoengineering atrocities?

Thanks for giving me a laugh. **Taking money from people to stop an activity that isn't happening. Talk about easy money.** I knew that the legal profession was hard up, but this is above and beyond. I hope it is okay to use this in some of my future presentations on ethics in science as compared to those in the legal profession.

NASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNAS

Dr. Marcia K. McNutt, President

National Academy of Sciences Physical location:

500 Fifth Street NW 2101 Constitution Avenue N.W. Washington,

D.C. 20001 Washington, D.C. 20418

[mmcnutt@nas.edu](mailto:mmcnutt@nas.edu) (202) 334-2101 (office)

My first response to NAS president Marcia McNutt is below:

Hello Marcia, as the president of the National Academy of Sciences, thank you for making your position ..... so very clear and inarguable. We will now prepare a post with your response and your public contact information so that the population at large can also be crystal clear on the part you are playing in covering up the ongoing climate engineering crimes of omnicide. Once the public is fully awakened to what has been done to them, and to who participated, will Nuremberg type trials ensue? Time will soon enough reveal the answer to this question. Populations around the globe are waking rapidly now, we at [GeoengineeringWatch.org](http://GeoengineeringWatch.org) will do our best to make your statement, and your official position, known to all.

Sincerely,  
Dane Wigington  
[geoengineeringwatch.org](http://geoengineeringwatch.org)

Marcial McNutt's 2nd message:

Dear Mr. Wigington:

I certainly didn't mean to offend you or anyone else at Geoengineering Watch, a group I have not heard of and a website that does not seem to open. I do sincerely believe that this attorney is taking advantage of your organization. I would be interested to learn what evidence you have that anyone is conducting [albedo modification](#). I am not aware of any.

Sincerely,  
Marcia McNutt

My second response to McNutt included the shocking photo taken over the Yosemite valley shown below.

Ms. McNutt, every attorney involved has long since examined the mountain of evidence which proves beyond reasonable doubt that global geoengineering is a reality, not just a proposal. [Every attorney](#) is working pro bono and more are joining as they realize what is at stake. The geoengineering issue will be brought to the light of day, the awakening is accelerating. I can only believe that all those who helped to hide these programs (especially in the academic community) will face unimaginable angst and demands for prosecution from populations that realize the degree to which they have been betrayed by the very "scientists" they were trained to trust.

We have so much data, Marcia, including historical [Senate](#) and [Presidential](#) documents. We have ever-growing files of [state certified lab test results](#) that prove conclusively agencies like EPA are not disclosing the mountain of heavy metal contamination (matching [climate engineering patents](#) exactly) that is raining down on us all. We are even communicating directly with some FED EPA employees that are in the process of being fired for trying to disclose the climate engineering contamination, they will soon tell all. Yes, the truth will be disclosed, and the public is finally waking up to the climate engineering atrocities and all those who have helped to hide these crimes.

The photo below was taken over Yosemite National Park, do you expect us to believe this is just "commercial jet traffic, Ms. McNutt? Really? Stay tuned, as we will not yield in our efforts until the truth is fully exposed along with all those that helped to hide it in exchange for a paycheck and a pension.

Sincerely,  
Dane Wigington

And now Marcia McNutt's final message in response to mine. The NAS president displays a profound change of tone and demeanor considering this exchange took place over a very short span of about 2 hours.

Thank you for letting me know that the attorneys are all working pro bono. I feel much better. I look forward to evaluating the scientific evidence that the government is conducting albedo modification [sub rosa](#). I imagine that the NAS would be asked to weigh the evidence brought

forward, so at this point it would be probably best if we not communicate on this topic further lest it be construed that the NAS is working with you on this topic. **I was not aware of any credible scientific evidence of such activity.** [JMH note added later: There is email documentation that McNutt was advised of evidence of aerial spraying on or before March 25, 2015.] Certainly none was brought forward when I chaired the [academy report on climate engineering](#). That was more than 18 months ago. Perhaps new evidence has materialized.

 NASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNASNAS

Are we to believe that individuals like Marcia McNutt, the NAS president, have no clue whatsoever about the ongoing and blatant climate engineering atrocities on our skies? [Are we to believe that the entire climate science community is also completely blind](#) to the massive global geoengineering/solar radiation management assault that is [so clearly visible](#) to any who bother to look up and do the slightest bit of objective investigation? [Climate engineering is nothing short of an unfolding global cataclysm](#), volumes of available data confirm this fact. The [illegal federal "gag order" that has been put in place against all National Weather Service and NOAA employees](#) is further confirmation of the [covert government climate intervention/weather warfare operations](#). If you are not OK with the official narrative of denial being pushed by leaders of the science community, if you are not OK with "elected officials" and the corporate media doing the same, then use their public contact information and let them know how you feel. If you do so, please send a professional, carefully crafted, and articulate message, this is what is most helpful to advancing the critical cause of exposing and halting climate engineering. Attach credible climate engineering [introductory](#) and follow-up information to any and all such communications, [which is imperative](#). We must all [make our voices heard](#) at this most critical hour, time is not on our side.
